EDUCATION

Alliance University, Bengaluru B.Tech in Information Technology (AR/VR)

PROFESSIONAL SUMMARY

Full-stack developer and video editor focused on building practical web applications, interactive systems, and hardware-software prototypes. Experienced in React, Next.js, TypeScript, PostgreSQL, and microcontroller systems (Arduino & ESP32). Intermediate video editor proficient in DaVinci Resolve with a strong grasp of narrative pacing and workflows. Passionate about applying new technologies to real-world problems with engineering clarity.

FEATURED PROJECT EXPERIENCE

UCHN — Unified Care & Health Network *Full-Stack Healthcare Coordination Platform & PWA*

Tech Stack: Next.js 14, React 18, TypeScript, Tailwind CSS, PostgreSQL, Prisma ORM, Socket.IO, JWT, Zod

- Doctor Discovery & Booking: Engineered clinic and doctor search with specialty filtering, transparent consultation fees, and slot conflict prevention.
- Pharmacy & Inventory Lookup: Implemented real-time medicine inventory tracking with pickup/delivery selection and transactional integrity.
- Live Clinic Queue & Emergency SOS: Created live waiting queue updates via Socket.IO and a structured 5-stage emergency dispatch workflow.
- PWA & Security Architecture: Built installable Progressive Web App with service-worker caching, Role-Based Access Control (RBAC), and JWT authentication.

SELECTED PROJECTS

- Hand Gesture Recognition AI: Computer vision model utilizing Python, OpenCV, and MediaPipe for real-time hand gesture tracking and contactless input recognition.
- Production Scheduling System: Manufacturing dispatch application optimizing machine sequence allocation, job scheduling, and bottleneck minimization.
- IoT & Connected Device Prototypes: Engineered embedded telemetry systems using ESP32 & Arduino microcontrollers, environmental sensor arrays (I2C/SPI), and live data streaming.

TECHNICAL SKILLS

Development: Python, Java, C, HTML, CSS, React, Next.js, TypeScript, Tailwind CSS
Backend & Data: PostgreSQL, Prisma, REST APIs, Socket.IO, Node.js
Hardware & IoT: Arduino, ESP32, Sensor-based projects, I2C/SPI Interfacing
Creative: DaVinci Resolve, Video editing, Editing workflows, Narrative pacing
Currently Exploring: AI-assisted workflows, Developer productivity, Practical automation
